FRAME Solid pine frame with Nozag springs

SEAT & CUSHIONS COVER HD foam, fibre and feather & ball fibre

SCATTER CUSHION Feather & ball fibre

PRODUCT CARE A light weekly vacuum will prevent build up of dust in the fibres and protect against marks. Papaya recommends the use of an appropriate furniture brush attachment with your vacuum cleaner. Do not use cleaners or cleaning agents that are abrasive, caustic or acidic. For indoor use only.

FABRIC PROTECTION A professionally applied fabric sealer will protect fabric from soiling. Do not saturate fabric, rather apply a couple of light coats of sealer. Treat spills and stains immediately with a damp cloth. Do not machine or hand wash, bleach, or tumble dry. DRY CLEAN ONLY.

Incorrect application of sealers and/or cleaners or allowing insufficient drying time voids the warranty.

DIMENSIONS Please note dimensions are approximate.

GOOD TO KNOW *Australian sunlight is intense. Whilst 100% natural linens score very highly in properties such as strength and durability, they have comparatively low fastness to light. See overleaf for further details and please discuss any concerns you have with us and we will be happy to guide you through the options.

FABRIC AND COLOUR FASTNESS

If you are considering purchasing a 100% linen sofa, ensure that the location is suitable and does not receive direct sunlight. Please ask us for advice on how you can reduce fading.

Whilst 100% natural linens score very highly in properties such as strength and durability, they have comparatively low fastness to light (synthetic fabrics score higher in this regard), so a degree of fading is unavoidable and should be anticipated when exposed to the intense Australian sun.

100% LINEN has a stone-washed raw appeal creased or crushed appearance of natural fibres. Tonal discolouration or tide marking is inherent in the dying process due to the natural fibres and is a feature to be appreciated.

VISCOSE is made from wood pulp dissolved in a chemical solution, then spun into fibres to make threads. When woven with natural threads it creates an extra durable yet soft fabric. It is also more colour fast than linen alone, making **ELEPHANT** the perfect choice for homes where exposure to direct sunlight may be an issue.

*Pure linen fabrics can be light sensitive, especially dark colours. Ensure location of sofa is not in direct sunlight through windows & skylights in order to avoid fading

Sure Seal Rug & Carpet Sealer will provide a barrier to some degree between the fabric and any spills of water based or oil staining - but always clean spills immediately. Sure Seal also provides some protection against day to day wear.
