Frame	Solid pine frame with Nozag springs
Seat cushion	HD foam, fibre and feather & ball fibre
Scatter cushion	Feather & ball fibre

GOOD TO KNOW

Australian sunlight is intense. Whilst 100% natural linens score very highly in properties such as strength and durability, they have comparatively low fastness to light. See overleaf for further details and please discuss any concerns you have with us and we will be happy to guide you through the options.

PRODUCT CARE

DRY CLEAN ONLY. All covers are fully removable. For indoor use only. A light weekly vacuum will prevent build up in the fibres and protect against marks. Papaya recommends the use of an appropriate furniture brush attachment with your vacuum cleaner. Do not use cleaners or cleaning agents that are abrasive, caustic or acidic.

FABRIC PROTECTION

Light Scotchgard can be applied if required to prevent fabric from soiling. Do not saturate fabric. Treat spills and stains immediately with a damp cloth.

FABRIC AND COLOURFASTNESS

If you are considering purchasing a 100% linen sofa, you must ensure that the location is suitable and away from direct sunlight. Please ask us for advice on how you can reduce fading.

Whilst 100% natural linens score very highly in properties such as strength and durability, they have comparatively low fastness to light (synthetic fabrics score higher in this regard), so a degree of fading is unavoidable and should be anticipated when the intense Australian sun is prevalent.

IVORY

62% COTTON

LOU127 3.5 seater 260x102xH95cm

100% LINEN has a stone-washed raw appeal creased or crushed appearance of natural fibres. Tonal discolouration or tide marking is inherent in the dyeing process due to the natural fibres and is a feature to be appreciated.

VISCOSE is made from wood pulp dissolved in a chemical solution, then spun into fibres to make the threads. A complex composition, however when woven with natural threads it creates an extra durable yet soft fabric. It is also more colourfast than linen alone, making **ELEPHANT** the perfect choice for homes where direct sun may be an issue.
