PRODUCT CARE

Wipe frame and cushion fabric regularly and as required with a clean, damp cloth to prevent dirt build-up. Wipe immediately if a spill occurs. Use a soft brush and mild detergent if needed. Rinse with cool water and remove any excess detergent. Do not use abrasive detergents, harsh chemicals or cleaners containing solvent.

PREVENTATIVE CARE

Do not leave cushions in the rain or to become saturated, allow the frame and cushions to thoroughly dry out once wet as mould will develop if they remain damp. Keep cushions dry and under cover when not in use. To extend the life of the fabric and cushion interior we recommend that cushions are stored out of direct sun and rain when not in use. For storing over prolonged periods, we recommend storage in a dry and ventilated space.

Sure Seal Rug & Carpet Protector or similar product will offer some protection against dirt and staining. Follow instructions on pack carefully as incorrect application voids your warranty. Keep cushions dry and under cover when not in use. This is available at papaya.com.au/brands/sure-seal or your local Papaya store

QUADRO OUTDOOR COLLECTION

As single components, the sofa and ottoman are compact enough for apartment balconies, yet in multiples they become a modular collection suitable for a space of any size and shape

The removable back supports and the aluminium frame allow the units to be easily reconfigured and the foam cushions can be stored inside the frame to extend their life by keeping them clean and dry
