PRODUCT CARE

Use a mild soap and a damp cloth to wipe the surface of the wicker every three months or as required. Use a soft nylon brush or low-pressure hose to clean in between the weaving.

For aluminum legs, gently clean with water and a mild liquid detergent to remove any dirt or splashes. Wipe down with a soft microfibre cloth or sponge and ensure the aluminum is dry to avoid water spots.

Do not use harsh chemicals or abrasive cleaning agents. If in close proximity to the sea, rinse frequently to remove corrosive sea spray.

DESIGNED FOR OUTDOORS

ECOLENE® is a lightweight outdoor weave made from High Density Polyethylene known for its durability, UV resistance and easy maintenance.

PREVENTATIVE CARE

Allow wicker to thoroughly dry once wet as mould will develop if it remains damp. Apply Sure Seal Tile and Grout sealer or similar to aluminum. Follow instructions on pack carefully as incorrect application voids your warranty.
