**PRODUCT CARE**

Regular cleaning and dusting will help keep the product in its best condition. Vacuum thoroughly on a weekly basis or as required, using low suction and a soft brush attachment. Wipe spills immediately. A damp cloth and mild soap can be used as required. Do not use bleach, acidic cleaners, or abrasive cleaning products. For indoor use only.

**PREVENTATIVE CARE**

The soft, luxurious surface can easily scratch so avoid sharp items like shoe buckles and clothing zips. Avoid direct or indirect exposure to sunlight by closing blinds and curtains if necessary as sunlight can dry and fade the pigments. A product such as Leather Protection Cream can be applied to protect the leather. It helps to prevent soiling and protects your furniture from water, oil and alcohol-based stains. Be sure to apply evenly so as not to darken the leather in patches. Leather Protection cream is available at: [Multimaster.com.au](http://Multimaster.com.au)
