MATERIALS

Polypropylene air injection technology – polypropylene reinforced with fibreglass.

PRODUCT CARE

You have purchased a beautiful Stellar chair made from sturdy polypropylene reinforced fiberglass.

Stellar are UV resistant but in harsh sun will fade over time and may become brittle. We recommend keeping them out of direct sunlight when not in use to avoid discolouration and prolong their life.

For your own safety avoid:

- leaning backwards on the back legs only when seated
- standing on the chair
- place on a slippery or uneven floor

Papaya recommends using a PH-neutral soap and water to clean frame and seat. Treat spills and stains immediately with a damp cloth. Do not use cleaning agents that are abrasive, caustic or acidic such as bleach or ammonia as they may affect the colour of the chair.

Designed in Holland by Sander Mulder, the Stellar chair is a simple, functional piece of furniture and can be stacked for easy storage
