

# ARABESQUE

---

*Arabesque lighting pieces are individually handmade by traditional Egyptian artisans. Each one is uniquely crafted from nickel over brass using a hand-hammered technique that results in delicate perforated patterns cast onto the wall.*

## MATERIALS

Nickel over brass

## PRODUCT CARE

### DAY-TO-DAY CLEANING

Use a soft duster or soft lint-free cloth to clear away dust from your lamp when necessary. We do not recommend using a dusting agent or cleaning product when dusting the lamp. For indoor use only.

### RIGOROUS CLEANING

Tarnishing may occur in varying degrees, depending on the environment. Aging is part of the charm and they are designed to develop an aged appeal. However, should you wish to restore the original finish, it is important to follow the instructions below carefully.

Apply a pH-neutral soap with a damp cloth, allow to dry for a maximum of 25 minutes, rinse with water and very gently wipe clean with a wet soft cloth.

If this does not restore the desired finish we recommend using Jif Cream Cleanser in the same way. Apply to the lamp surface – DO NOT RUB – and allow to dry for 20 minutes. Remove Jif with a soft wet cloth.

You may need to use a small, pointed tool like a toothpick to remove any remaining cleanser from perforations.

## WARNINGS

Arabesque lights should never be cleaned or treated with brasso or silvo style cleaners. When rinsing your lamp never get water in the electrical fitting.
