10,000 martindale rubs

CHA214
Dining chair

BLACK

FRAME: UV resistant polypropylene

FABRIC: 100% acrylic sunbrella fabric
10,000 martindale rubs

CHA144
Dining chair

PRODUCT CARE

Our polypropylene is made from reinforced fiberglass and recycled waste materials to create a durable and long lasting material that is suitable for indoors or outdoors. Seat cover removable for hand wash.

Use a PH-neutral soap and water to clean the frame and seat. Treat spills and stains immediately with a damp cloth. Allow the frame & cushions to dry thoroughly once wet to avoid mould developing. Do not use cleaning agents that are abrasive, caustic or acidic such as bleach or ammonia as they may affect the colour of the chair.

PREVENTATIVE CARE

Polypropylene is UV resistant, but in harsh sun will fade over time and may become brittle. Keep out of direct sunlight when not in use to avoid discolouration and prolong the life of the material.

Whilst outdoors fabrics have been engineered to withstand the elements they are still susceptible to fading if exposed to prolonged sunlight & will attract dirt if unprotected. These risks can be mitigated & the lifespan extended by storing under cover when not in use.

SUNBRELLA® fabric is known for its durability and resistance to UV
